

DESIGNS THAT SERVE

H2B, Inc. is a Service-Disabled Veteran-Owned Small Business (SDVOSB) founded by Ken Bryant and Tod Henning with the philosophy of providing our clients personalized, comprehensive project management, civil and structural engineering and design services. Since our inception in 2005, we have supported the Department of Veterans Affairs (VA), U.S. Army Corps of Engineers (USACE), and General Service Administration (GSA) at mission-critical federal facilities on projects ranging from new medical buildings and parking structures to complex infrastructure upgrades and campus-wide utility improvements.

H2B combines small-business responsiveness with large-program experience. Our multidisciplinary team delivers constructible, UFC-compliant designs through proven quality control, detailed coordination, and client-focused project management. Each assignment receives the same commitment to performance, safety, and innovation.
